The Central Asia Climate Change Conference:  
“Climate Change and Development”  

16-17 May 2023 | Dushanbe, Tajikistan

THE CONCEPT

The 5th Central Asia Climate Change Conference (CACCC-2023) is organized by the Regional Environmental Centre for Central Asia (CAREC) within “Climate Adaptation and Mitigation Program in the Aral Sea Basin AF” (CAMP4ASB AF), “Central Asia Nexus Dialogue Project: Fostering Water, Energy and Food Security Nexus and Multi-Sector Investment” (NEXUS) in cooperation with the Committee for Environmental Protection under the Government of the Republic of Tajikistan, PROGREEN and the “Central Asia Water & Energy Program” (CAWEP), a partnership between the World Bank, the European Union, Switzerland and the United Kingdom. The Conference will be held on 16-17 May 2023 in Dushanbe, Tajikistan. The Conference will bring together all stakeholders to discuss water, energy, food, and environmental sustainability in the context of a changing climate in the Central Asia region. The conference participants will be informed about the progress of Central Asian countries related to climate mitigation and adaptation action, relevant initiatives to achieve cross-sectoral climate resilience, and platforms available for regional and international cooperation.

Background
The Central Asian region is exposed to negative impacts of a rapidly changing climate because of a harsh and unique context – an arid, landlocked, snow-fed region with most of the water originating in the glaciers of the upstream mountains and neighborhood countries, extensive agriculture, aging infrastructure, and high population growth. Although countries of the region – Kazakhstan, Kyrgyz Republic, Tajikistan, Turkmenistan, and Uzbekistan – have distinct landscapes, natural-climatic conditions, development priorities, a transboundary nature of climate change will equally affect each Central Asian nation with novel risks. To name few of them that countries in the region are facing already today: changes in temperature and water regimes, higher maximum temperatures, and longer duration of heat waves; an increase in the total amount of precipitation, spatial and seasonal shifts of precipitation; increasing occurrence of extreme rainfalls and droughts resulting in land degradation, water quality, desertification, dust storms, increasing pressure on infrastructure.

Moving towards carbon neutrality and climate resilience through low-carbon, climate-resilient development; updating water, energy, and food infrastructure to address climate risks, strengthening the capacity of local communities, implementing progressive regulatory and institutional reforms to attract the necessary investments - these are the strategic challenges to be addressed by the governments and their development

1 CAREC implements CAMP4ASB AF jointly with EC IFAS under the financial support of the World Bank and the Green Climate Fund
partners in Central Asia region. Unprecedented economic, social transformations and regional cooperation are required to address these challenges.

**Expected results**

- The CACCC-2023 participants will learn about the progress, challenges and gaps with implementation of climate commitments by the Central Asian countries, governance and financial arrangements for implementation of sector-specific strategies at the national and local scales, and available platforms for regional climate coordination and cooperation;

- The CACCC-2023 participants will also discuss potential for regional collaboration and learn about the outcomes of participation of the Central Asian countries at the UNFCCC COP27, as well as plans for COP28;

- The national government officials and international development partners will exchange views on the challenges and opportunities of strengthening water, energy, food, and environmental (WEFE) sustainability in the context of a changing climate and implications of applying WEFE nexus approach.

**Target audience**

Representatives of the ministries of economic development, environmental protection and ecology, water, agriculture, energy, hydrometeorological services, and other line ministries of the Central Asia countries will attend CACCC-2023. Involvement of international organizations, multilateral development banks, the expert community, youth leaders, scientific institutions, civil society organizations, water/energy utilities, and business representatives is also expected.

The event will be streamed online with the opportunity for an active participation and interaction by online participants. For your convenience, further below are local start times of the Conference for **online connection**:

<table>

**Participation format:** hybrid  
**Registration of participants** is obligatory, please use the following [link](#).  
**Working language:** Russian, English. Simultaneous translation will be provided by the organizers.
INFORMATION NOTE
for online participants of the 5th Central Asia Climate Change Conference (CACCC-2023)

The CACCC-2023 events will take place in multiple halls, each equipped with a separate online broadcast channel to enable virtual participation. To attend the sessions you are interested in, as per the CACCC-2023 Program, you must register for the relevant broadcast channel for each hall. Registration for Broadcast Channel 1 only needs to be done once, and the link received will be valid for online participation in all the sessions listed for the entire conference. For Broadcast Channel 2, upon registration, you will receive an individual code and Zoom link via email for each session you have registered for.

Day 1. May 16, 2023

09:00 - 12:30
Opening Session [link](Channel 1)
Opening Plenary: Climate Change and Development in Central Asia [link](Channel 1)
Panel Discussion 1: National policies, strategies and programs for climate mitigation and adaptation [link](Channel 1)

14:00 – 16:00
Parallel Session A – Water and Energy Security, WEF Nexus and Youth engagement potential
  ● Parallel Session A.1: Water Security [link](Channel 1)
  ● Parallel Session A.2: Energy Security [link](Channel 2)
  ● Parallel Session A.3: WEF Nexus under Climate Change [link](Channel 2)
  ● Parallel Session A.4: Youth Session: Connecting Policy, Activism and Science [link](Channel 2)

16:30 – 18:00
Parallel Session B – Multi-sectoral Cooperation to address climate Impact
  ● Parallel Session B.1: Circular Economy [link](Channel 1)
  ● Parallel Session B.2: Landscape Restoration for Climate Resilience in Central Asia [link](Channel 2)
  ● Parallel Session B.3: WEF Nexus Next Steps [link](Channel 2)
  ● Parallel Session B.4: Climate transparency, reporting and verification [link](Channel 2)

Day 2. May 17, 2023

09:00 – 11:00
Panel Session 2: Leveraging regional collaboration in a changing global policy environment [link](Channel 1)

11:30 – 13:00
Parallel Session C – Health and Resilience for Sustainable Development
  ● Parallel Session C.1: Air pollution, health, and climate change [link](Channel 1)
  ● Parallel Session C.2: Building Climate Resilience on local level [link](Channel 2)
  ● Parallel Session C.3: Climate Change impacts on transboundary water resources from source to sea [link](Channel 2)

14:30 – 17:00
Panel Session 3: Climate financing: needs and opportunities [link](Channel 1)
Closing Plenary [link](Channel 1)
The Central Asia Climate Change Conference:

</table>
| 14:00-16:00| **Parallel Session A – Water and Energy Security, WEF Nexus and Youth engagement potential**

- **Venue**: Regency Ballroom (G floor)
  - **A.1: Water Security**
    - Moderator: William Young, CAWEP Program Manager
    - Harnessing Satellite Data to Improve Irrigation Performance
    - Enhancing Cooperation for Shared Hydraulic Infrastructure
    - Snowpack Monitoring & Snowmelt Forecasting
    - Energy-Efficient Water Services
    - Strengthening Groundwater Management in Central Asia
    - The Water-Energy Nexus Issues in Central Asia
    - Central Asia Knowledge Network
    - Youth Inclusion in Water and Climate in Central Asia

- **Venue**: Toronto Room (1 floor)
  - **A.2. Energy Security**
    - Moderator: Jane Olga Ebinger, Sector Leader, Sustainable Development, Central Asia, World Bank
    - Renewables & decarbonization
    - Regional energy connectivity
    - Energy markets and trade

- **Venue**: Brussels Room (G floor)
  - **A.3: WEF Nexus under Climate Change**
    - Moderator: Zafar Makhmudov, Executive Director CAREC
    - WEF innovations
    - Sedimentation process at the water facilities: methods of sediment removal and recycling based on the demo project at Tyamuyun Hydroelectric Complex
    - Reducing the energy intensity of the pumping stations based on Tajikistan Nexus demo project
    - Involvement of the private sector’s investments to the afforestation of the dried bottom of Aral Sea
    - Introduction of the Nexus approach in the educational curriculum
    - WEF Nexus on regional level: IFAS role in WEF management

- **Venue**: New York Room (1st floor)
  - **A.4: Youth Session: Connecting Policy, Activism and Science**
    - Moderator: Larissa Kogutenko, DKU
    - Engaging next-gen climate leaders of Central Asia through science and research, business, and activism
    - Exploring youth perspectives on addressing, mitigating and adapting to climate change
    - Central Asian youth in action: opportunities, gaps and needs

| 09:00-11:00   | **Panel Session 2: Leveraging regional collaboration in a changing global policy environment**  
**Venue:** Regency Ballroom (G floor)  
**Moderator:** Dr. Alexey Kokorin, Head of the Climate and Energy Program, WWF Central Asia  
**Video:** about CAMP4ASB project  
**Block 2.1: International support and potential for regional collaboration**  
**Key presentations:**  
- Key insights from the IPCC 6th Assessment Report, Dr. Rupa Mukerji, Lead IPCC Author, Director of Advisory Services, HELVETAS Swiss Intercooperation (online)  
- International development support for regional climate initiatives:  
  - Mr. Torsten Brezina, Cluster Coordinator in Central Asia, GIZ  
  - Ms. Evetta Zenina, Natural Resources Officer, FAO Sub-regional Office  
  - Mr. Oleg Bulanyi, Senior Programme Officer, Initiative for Climate Action Transparency ICAT  
- CACIP as an information platform for more efficient regional knowledge exchange, Mr. Firuz Ibragimov, Senior M&E Specialist, CAREC  
- Central Asian Regional Climate Network of civil society organizations (CARCN), Dr. Svetlana Mogilyuk, CA RCN Coordinator  
**Q&A** |

Moderator: Jane Ebinger, Sector Leader, World Bank  
- Air Pollution, Health and Climate Change - from Co-Benefits to Coherent Policies  
- Clean Air Initiatives in Central Asian Countries  
- Air Quality Management Priorities Central Asia  
- Regional Cooperation for Clean Air – Opportunities and Challenges in Central Asia  
C.2: Building Climate Resilience on local level  
Moderator: Mr. Vladimir Grebnev, Regional Climate Change Specialist, CAREC  
- Climate Change Resilience in Ferghana Valley  
- Climate investments under CAMP4ASB in Tajikistan and Uzbekistan  
- Vulnerability assessment and adaptation planning on local level  
- Climate Change adaptation on local communities: best practices and lessons learned  
C.3: Climate Change impacts on transboundary water resources from source to sea  
Moderator: Zafar Makhmudov, Executive Director, CAREC  
- Cryosphere Observation and Modelling for improved Adaptation in Central Asia (CROMO-ADAPT)  
- Introduction to the SAPPHIRE Project  
- Weather, Water and Climate Services in Tajikistan and the Zerafshan basin  
- The exchange of water quality data and capacity-building activities for the water quality experts |
